

# PROFILE THIRD QUARTER 2021 EMERGING WEALTH EQUITY STRATEGY

#### **EMERGING WEALTH EQUITY**

- Style: GARP
- Approach: Active; Bottom Up
- Benchmark: MSCI Emerging Markets Index
- Inception: 4/1/2011
- Strategy Assets: \$392 MM

#### **INVESTMENT PHILOSOPHY**

We believe that emerging market economies will experience faster GDP growth driving rising per capita income and domestic consumption over the long term. We believe this global growth trend will drive enhanced stock price performance of quality companies that are well positioned to serve these growing consumer driven economies. Companies in the portfolio will primarily be domiciled in emerging markets with strategic exposure to developed market companies serving the emerging markets consumer. Emphasis will be placed on best in class companies that we believe are trading at attractive valuations.

### ABOUT OUR FIRM

GW&K is a dynamic investment management firm that offers active equity and fixed income investment solutions to meet the needs of a diverse client base. At our core is an entrepreneurial spirit of innovation, a desire to help educate our clients and a level of service that is hard to come by. Our founding principles of applying rigorous fundamental research, focusing on quality and maintaining a long-term view still guide our investment process today.

- Founded in 1974
- \$55 Billion Under Management
- Individually Managed Accounts
- Serving Individuals and Institutions
- All data as of September 30, 2021

### STRATEGY HIGHLIGHTS

# 40 - 80 Holdings

### WHY EMERGING WEALTH?

- Emerging market economies will experience faster GDP growth than developed markets.
- Emerging growth is shifting to consumption as per capita incomes rise.
- This global growth trend presents opportunities for companies that can best serve these consumers and offer products and services with good value.
- We seek out best in class businesses anywhere in the world that have material exposure to the growth of the middle class in emerging markets.
- Our portfolios are more concentrated, offer greater liquidity and experience lower turnover than traditional emerging markets managers.

## A DISCIPLINED APPROACH TO PORTFOLIO CONSTRUCTION

GEOGRAPHIC REGION	Primary exposure to companies in emerging markets or developed market companies that derive a meaningful amount of their revenues or profits from emerging markets countries.	
MARKET CAP RANGE/ LIQUIDITY	At time of initial purchase, companies will typically have a market cap of greater than \$2 billion or have a minimum average daily trading volume greater than \$15 million.	
COUNTRY AND SECTOR WEIGHTINGS	Bottom-up industry focused security selection process drives sector allocation. Variation from country/ sector ranges due to market conditions is allowed and reviewed by the portfolio team.	
	MSCI Emerging Markets Index Weight	Portfolio Weight
	≥5%	Maximum: 3x benchmark but < 60% of portfolio
	<5%	Maximum: 3x benchmark or 20% of the portfolio, whichever is greater
	Developed market company exposure typically less than 25% of portfolio	
HOLDINGS	<b>IGS</b> The number of securities in a fully invested portfolio typically ranges between 40–80 holdings. Typical target position size: 2-5%	
	Typical maximum position size: 7.5%	
CASH	Our philosophy is to remain fully invested in equities. Cash levels in accounts will typically range between 0% and 5%.	
TURNOVER	The average annual portfolio turnover is typically expected to be less than 50%.	

## **RESEARCH ADVANTAGES**

- Experienced sector based team averaging 28 years of investment experience.
- Rigorous fundamental due diligence includes meetings with company managements and extensive financial statement analysis and modeling.
- Focus on high quality companies with better balance sheets, good profitability ratios and solid cash flow.
- Price target scenarios help navigate volatility and identify companies with optimal risk/return profiles:
  - » Base case reflects assumptions having the highest probability
  - » <u>Pessimistic case</u> reflects assumptions for a series of disappointments
  - » **Optimistic case** reflects assumptions for a series of positive surprises
