## COMPREHENSIVE RESEARCH

### Philosophy

Fundamental municipal bond research plays an important role in our investment process, particularly during periods of rapidly changing economic signals. We rely on our own proprietary research, not on rating agencies' conclusions or bond insurance.

### Focus

Drawing from extensive industry knowledge, our analysts conduct a rigorous evaluation of existing holdings and potential purchases. We focus our research on the underlying credit, while our Strategy targets large, liquid, investment grade issuers that are active primary market participants.

### Opportunity

Our presence in the municipal market provides us access to secondary offerings and new issue opportunities nationwide enabling us to greatly diversify our portfolios and capitalize on market inefficiencies. We subscribe to numerous external research services, which are analyzed in conjunction with the bond indentures and reports provided by the issuers. Over the years, we have developed an extensive database of past and current research that provides us with historical financial analysis.

### Risk Control

Our credit analysts rely on multiple defensive measures to protect portfolio principal and to ensure that every buy and sell decision is in the best interest of our clients. We evaluate several factors such as the issuer's liquidity, financial flexibility, and trends at the state and sector levels.
