INVESTMENT PHILOSOPHY

We believe that by actively managing a diversified portfolio of short-term, non-investment grade corporate bonds, we can generate higher total return over the long term while assuming manageable levels of risk. We look to invest in companies that we believe offer the best risk-adjusted value.

INVESTMENT PROCESS

PORTFOLIO CONSTRUCTION

- Our assessment of macroeconomic conditions and relative valuations guides allocation between high yield and investment grade bonds
- Augment our proprietary credit analysis with independent research

TOP-DOWN ANALYSIS

- Analysis of business cycle, valuation trends and market technicals
- Analysis guides outlook on market, sector allocation

BOTTOM-UP SELECTION

- Quantitative and qualitative research techniques
- Prefer improved balance sheet strength and liquidity from BB and B issuers

RECOGNITION OF OPPORTUNITY

- We seek companies that maintain sustainable competitive advantages and that may benefit from emerging cyclical or secular drivers
- We seek to identify companies that are undervalued due to temporary or discrete events
- We focus on income as a primary source of return rather than price appreciation, which can be more volatile

COMPREHENSIVE RESEARCH

Comprehensive research by our seasoned team is central to our investment process and risk managed approach. While researching new securities, our team focuses on fundamentals, valuation, and technicals.

Fundamentals

Our research begins with an extensive review of financial trends, cash flow, liquidity, as well as customer and supplier relationships. Assessing the quality of management is also a key component of our research process. Competitor and market analysis yields important insights on industry growth trends, and keeps us informed of relevant regulatory, technological and environmental concerns. Our research includes a thorough examination of a bond’s characteristics.

Valuation

We study historical spreads relative to industry peer group, and similar quality credits to identify those that are trading cheap or rich. We estimate valuations based upon current fundamentals and technicals. The team utilizes Bloomberg Analytics throughout the research process.

Technicals

We assess factors such as M&A, shareholder friendly activities and supply considerations. We examine covenants to ensure protection of bondholder rights. The team also reviews the mortgage back security supply outlook and investor demand before making relevant decisions.
