(ISIN IE00B4W50S88)

Objective and Investment Policy

Investment Objective

The Fund seeks long-term growth of capital through investments primarily in the equity securities of companies which may be located in either developed or emerging markets and which are exposed to, and derive revenue or profits from, emerging market countries.

Investment Policy

The Fund will primarily invest in equity securities in order to achieve its investment objective. The Fund's focus will be on global companies that are traded on Recognised Markets which are emerging markets which the Investment Manager considers to have the potential to grow earnings over the medium to long-term, or are traded on Recognised Markets which are developed markets which have the potential to derive revenues and profits from emerging markets.

Under normal market conditions, the Fund will usually hold between 40 and 80 securities and its main investments will include equities, securities convertible into equities, and securities with equity characteristics.

The Fund may allocate investments across securities of all-market capitalizations of any industry sector found anywhere in the world.

The Fund may invest in financial derivative instruments to reduce risk or gain exposure to a market for the underlying physical instruments, but they will not be used speculatively or for leverage. The Fund may enter into swap transactions to increase income or capital gains.

Any income earned on investments will be added to the value of your shares and you can buy and sell shares on each business day of the Fund.
