**INVESTMENT PHILOSOPHY**

We believe that municipal bonds are a natural fit for ESG portfolios given the public service mission of the issuing entities. We also believe that an active, national approach provides greater potential to reduce risk and maximize after-tax returns. We emphasize bottom-up research to target investment grade short to intermediate bonds, and maintain flexibility to position portfolios to take advantage of market trends. Our approach fully incorporates ESG analysis into this process through a comprehensive and forward looking assessment of risk.
