INVESTMENT PHILOSOPHY

We believe that a company's ability to generate consistent and sustainable earnings growth, along with a good return on capital, will drive enhanced stock price performance over the long term. We also believe that stocks can become mispriced through the improper evaluation of fundamentals or short-term trading decisions. We seek to pay a reasonable price for the growth opportunities we identify and apply a disciplined valuation process to uncover securities that may be undervalued in the market. We believe a careful assessment of a company's upside potential and downside risk is critical in navigating the emerging markets asset class.
