INVESTMENT PHILOSOPHY

We believe that emerging market economies will experience faster GDP growth driving rising per capita income and domestic consumption over the long term. We believe this global growth trend will drive enhanced stock price performance of quality companies that are well positioned to serve these growing consumer driven economies. Companies in the portfolio will primarily be domiciled in emerging markets with strategic exposure to developed market companies serving the emerging markets consumer. Emphasis will be placed on best in class companies that we believe are trading at attractive valuations.

INVESTMENT PROCESS

WHY EMERGING WEALTH?

- Emerging market economies will experience faster GDP growth than developed markets.
- Emerging growth is shifting to consumption as per capita incomes rise.
- This global growth trend presents opportunities for companies that can best serve these consumers and offer products and services with good value.
- We seek out best in class businesses anywhere in the world that have material exposure to the growth of the middle class in emerging markets.
- Our portfolios are more concentrated, offer greater liquidity and experience lower turnover than traditional emerging markets managers.
