GW&K Trilogy Emerging Markets Fund ("Fund")

A sub-fund of Trilogy Investment Funds plc ("Company")

GW&K Trilogy Emerging Markets Fund Class B Shares (GBP)

(ISIN IE00B3ZQZS60)

The Fund is managed by Carne Global Fund Managers (Ireland) Limited (the "Manager").

Objective and Investment Policy

Investment Objective

To provide investors with a rate of return (after fees and expenses and before taxes) which exceeds that of the MSCI Emerging Markets Index Net Dividends ("Benchmark").

Investment Policy

The Fund is actively managed and will invest in a portfolio of securities and cash in order to achieve its investment objective. The Fund's focus will be on listed global companies that are generally included in the Benchmark which the Investment Manager considers to have the potential to grow earnings over the medium to long-term.

The Fund will usually hold between 70 and 120 securities and its main investments will include equities, securities convertible into equities and securities with equity characteristics. At any point in time, the Fund will be invested in at least 10 countries. The Fund will be managed by reference to the Benchmark and the Investment Manager expects that the majority of the Fund's equity securities will be components of the Benchmark. As an active investment manager, the Investment Manager expects to use its discretion to invest in companies, sectors, or markets not included in the Benchmark from time to time, in order to take advantage of specific investment opportunities. The investment strategy will restrict the extent to which the portfolio holdings may deviate from the Benchmark. While the deviation may

nonetheless be material, this restriction could limit the extent to which the Fund can outperform the Benchmark. The Fund's aggregate exposure to countries which are not part of the Benchmark shall not exceed 20% of the Fund's Net Asset Value. No more than 10% of the Fund's Net Asset Value may be invested in cash except during periods of high cash flows.

The Fund promotes environmental and social characteristics through the application of environmental, social, and governance ("ESG") factors combined with sustainability risk. Each investment is assessed against ESG factors as part of the investment process.

The Fund may invest in financial derivative instruments to reduce risk or gain exposure to a market for the underlying physical instruments, but they will not be used speculatively or for leverage.

Currency forwards may be used to manage currency exposure to investments which are not made in Euro (which is the Fund's base currency used to measure its value), but is not currently intended to do so.

Any income earned on investments will be added to the value of your shares and you can buy and sell shares on each business day of the Fund.

This Fund may not be suitable for investors who plan to withdraw their contribution within three to five years.
